www.blackrockaero.net

The Black Rock Aero Airshow Subject Matter Executer main responsibility is to adhere to the mission. Black Rock Aero capability to face challenges as opportunities and instant persistent in finding solutions that exceed expectations. Black Rock Aero is able to find opportunities for creative interpretation within pre-existing constraints.

Black Rock Aero duties include, but not limited to:

- * Developing point papers and presentations suitable for Flag-level decision making
- * Arranging a place where Aircraft are housed and maintained and from which they are dispatched for service.
- * Sharing the experience with depot, intermediate, or aviation operation, maintenance processes and procedures.
- * Offering the experience as a Requirements squadron.
- * Applying the knowledge of the Air show operation base, including supply and man power.
- * Implementing the ability to operate in high pressure environments to support and execute the Air Show.

Aerobatic is just
a love story

AirBoss Multi Venue

The AirBoss presents all pilot briefings during events and is the “Federal Aviation Administration (FAA) Responsible” on the Airshow Waiver. Black Rock Aero designated AirBoss is aware of all applicable aviation regulations regarding air displays and how to apply them throughout the entire operation. Black Rock Aero main duty is to coordinate the safe planning and execution of all flights in any complex air show environment. Black Rock Aero AirBoss is considered as an executor with regards to the FAA and Federal Aviation Regulations (FAR) that govern Aerial Events. Black Rock Aero not only work airshows, but also parachute exhibitions, flyovers for raceways and other events.

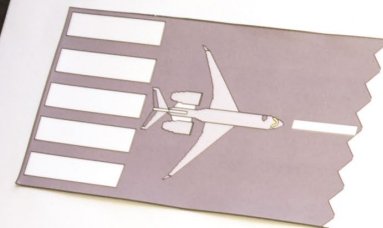

A person is standing in the center of a large, well-lit hangar. The hangar has a high ceiling with a grid of dark beams and several rectangular light fixtures. To the left, the tail and wing of a large white aircraft are visible. In the center, a smaller white aircraft is on display. To the right, another aircraft is partially visible. The person is silhouetted against the bright light coming from a large window or opening in the background.

The Special Aviation Event Executer typically oversees the entire planning process, from initial concept development to execution, while in our company and due to the vast experience, Black Rock Aero also handles the event coordinator job and focuses on the logistics of the event itself. In other words, Black Rock Aero also handles the responsibilities for the big picture, in addition to handling the details. The Aviation Safety Specialist main job is developing and presenting safety seminars to pilots. Black Rock Aero Safety Specialist uses multiple approaches to ensure the safety of aircraft, aircraft operations, airspace, flight traffic, airports, air show viewers and all other aviation- related elements. The Air Boss shall ensure that all emergency services, Pilots Safety Briefing, before the program commences with all the relevant parties i.e. Display Pilots, Skydivers, Air Traffic Controllers, Organiser, Public commentator, Emergency services, Marshalls, airside approved media / photographers and all parties performing a function related to airside activities including cars, bikes, cheerleaders etc.

Lorem ipsum

SAFETY

The Ground Operations Specialists sequence the aircraft out of the hot ramp to the AirBoss. The airshow ground operations team is able to react to and assess the severity of a ground emergency and direct the appropriate emergency response. If safety is at the forefront of the air show operations, then a Professional Airshow Ground Operations team is an absolute must.

Ground Operations Staff are highly trained in the following:

| | | |
|---|-----------|---|
| Ground Marshalling | - - - - - |  |
| Fuel & Oil Logistics | - - - - - |  |
| Tugging of aircraft | - - - - - |  |
| Liquid Oxygen (LOX), Gas Oxygen (GOX), Nitrogen Gas (N2) Servicing | - - - - - |  |
| Air Start/Electric Start Carts | - - - - - |  |
| Smoke Oil Operations | - - - - - |  |
| Operational Envelopes of Military & Civilian Aircraft Warbird Operations & Warm- up Times | - - |  |
| Pre-Flight of Aircraft | - - - - - |  |
| Helicopter Operations | - - - - - |  |
| Hangar of Aircraft | - - - - - |  |
| H/HAZMAT Response | - - - - - |  |
| Fixed Base Operation (FBO)/Base Operations/Test-Line Coordination | - - - - - |  |
| Airplane Ride Operations & Coordination | - - - - - |  |
| Ground Support Equipment Coordination | - - - - - |  |

Our team of Airshow Professionals has provided locations worldwide with airshow services, including FAA Certified Multi-Venue Professional Airbosses, Ground Operations Specialists, Announcers, military & civilian aircraft acquisition, Federal Aviation Administration (FAA) /Department of Defence (DOD)/Temporary Flight Restriction (TFR) paperwork coordination, Airspace Management, computerized ramp layouts, and flyby coordination. We specialize in daytime airshows, twilight/night airshows, and flyovers at airports, military bases, parks, raceways, and beachfronts all around the world.

Introduction

Aero Intelligence was created in 2006 with the vision that the aviation industry needs an organization which thinks and functions and operates like its customer base.

Profile covers with Technical Introduction for AOC-MRO and Program Management of Maintenance/Planning/ Engineering/Logistical Support, Aero Intelligence focus on providing its partners with services that is consistently excellent, professional, innovative and customer-driven in order to ensure their successful and continue support.

Varghese Samuel

AERO
INTELLIGENCE

Executive Summary

The management team of Aero Intelligence as a combined resource, with our partners, can enhance and expand the client presence in the aviation industry by providing Branded turnkey aviation asset services to Aircraft operators and Leasing Companies worldwide. Combining our years of experience, powerful infrastructure, broad spectrum of client services, along with sound financial backing, the team is excited about this new endeavor to provide superior asset management and operator asset transitional services worldwide.

Our Team members fully understand the critical nature of quality and customer service. Aero Intelligence can offer an excellent combination of technology and skilled personnel meeting world-class standards. We are committed to provide the highest levels of quality, efficiency and cost effectiveness, supported by a professional engineering/support team with competitive delivery times.

Executive Summary

Aero Intelligence houses the “best in class” of the industry, employs the latest technologies and has defined processes. Having collaborated with numerous customers during the past years, we have the willingness, expertise, drive and track record to meet the business objectives required.

Aero Intelligence’s infrastructure is geared to undertake the most demanding of projects. Our primary goal is to provide an economical and methodological approach to the process. With our advanced communication methods and infrastructure, our development/resource centers work as a virtual extension of your operational vision, providing round the clock service, support and product development while cutting nonproductive downtime significantly.

Current Operations and Processes

Aero Intelligences initial business plans involved Flight Crew placement, Training, Charter Operations, aircraft Maintenance and Engineering and Leasing of Aircraft. Most recently we have branched out in more hands-on technical disciplines as a service provider; sourcing qualified manpower, aircraft support services and over-site for commercial aircraft operations. We specialize in FAA/EASA process implementation with sourcing of qualified manpower, which can range from licensed mechanics, to engineering (all disciplines including operations [weight & balance]), to inspection, to material specialists, to mid-level management.

Through these extended services we can act as your singular focal point for project management for asset acquisition/disposition, line setup and support, engineering and certification services, aircraft/asset inspection and sourcing, import/export, A/C registration, planning and start up carrier services (including regulatory approval and compliance) as well as direct OEM operational support.

Managing the Processes

Aero Intelligence process begins with the Customer needs and is completed with YOUR Success.

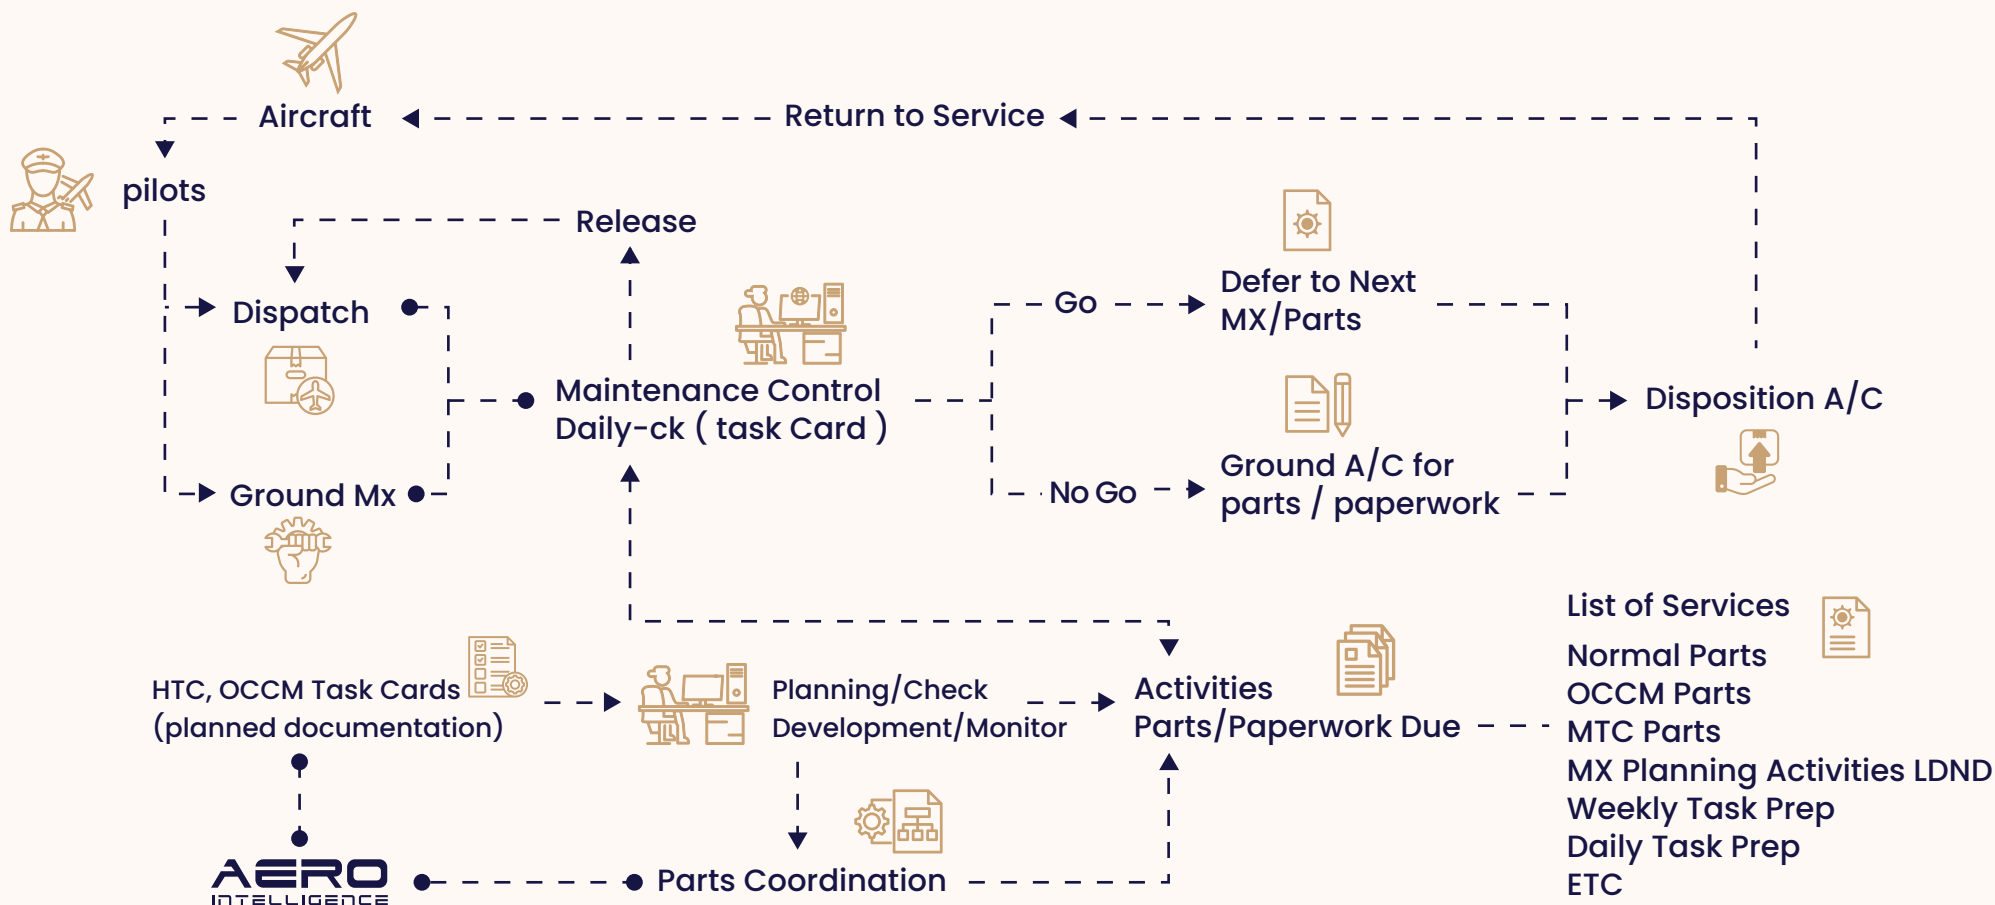

Our process has a number of key attributes:
It is definable and can be communicated
It anticipates and plans for barriers, obstacles, setbacks, communication issues, etc.
It establishes lines of accountability
It adds value to the execution of the project

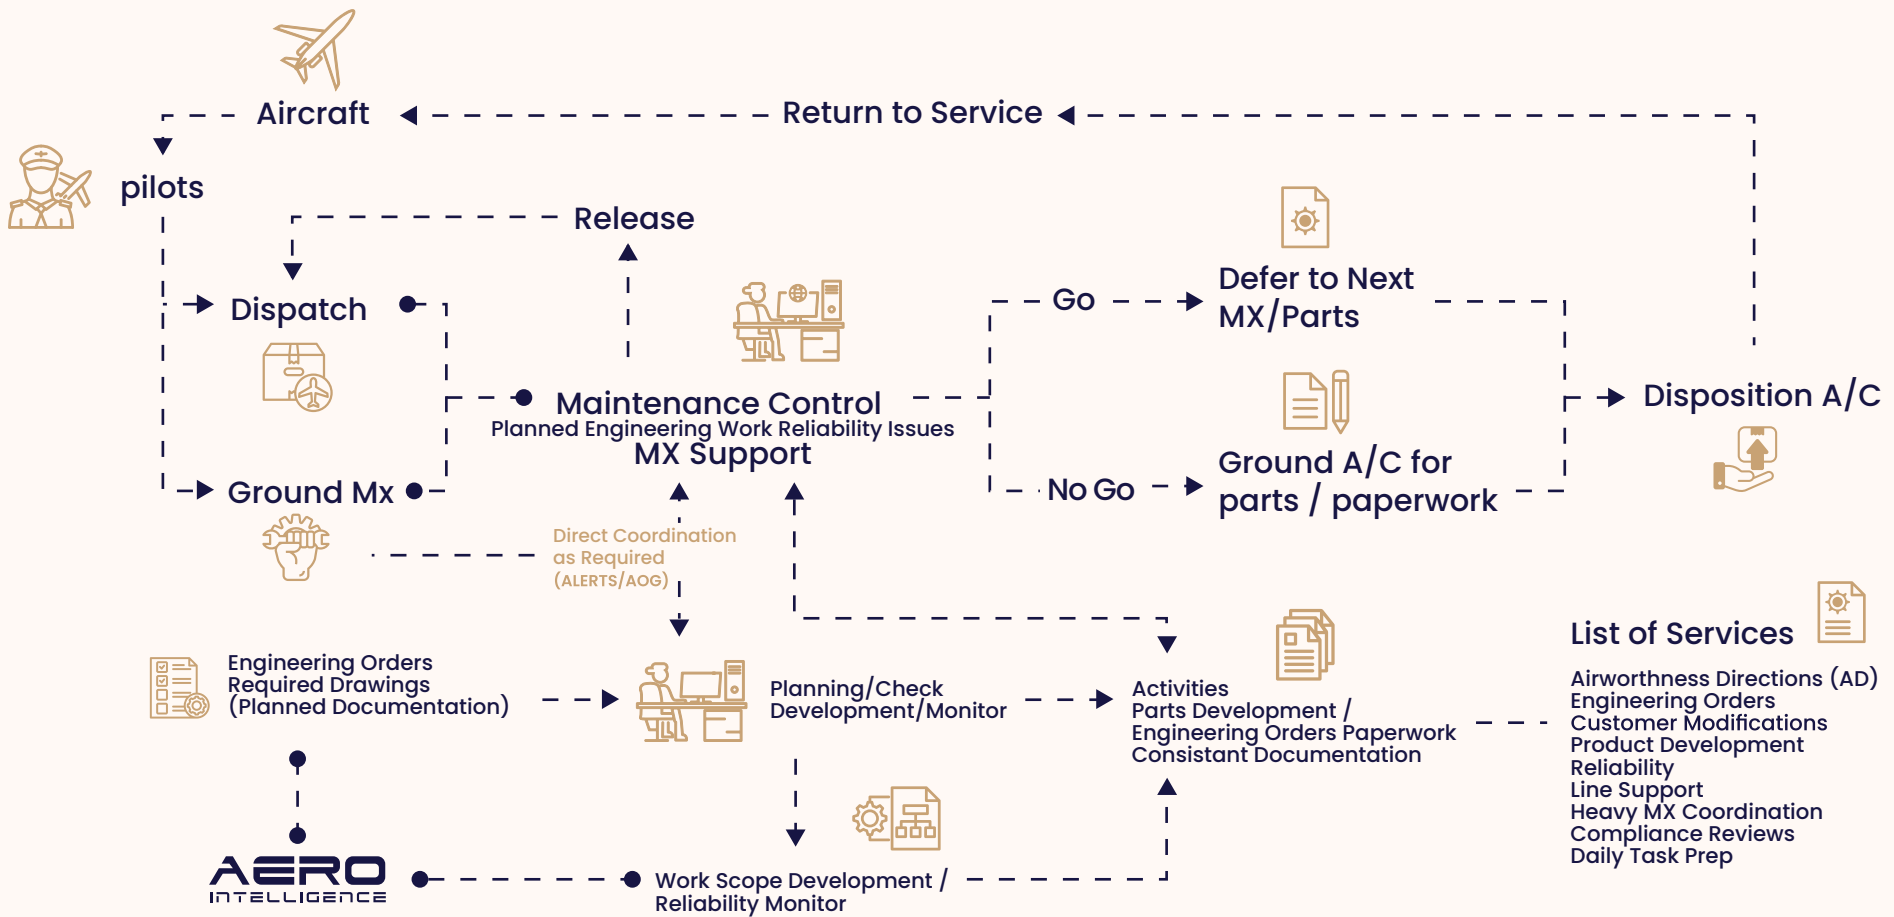

Planning Support

Outsourcing of
Planning Support
for Aircraft

Engineering Support

Outsourcing of Engineering Support for Aircraft

Aircraft Delivery Outsourcing

AERO INTELLIGENCE offers professional services to leasing companies. In the current industry context, aircraft leasing has grown with airlines as it enables them to expand their fleet quickly and cost effectively. The services of AERO INTELLIGENCE covers all business models of aircraft leasing companies to optimize the asset & profit by timely advising of maintenance requirements, lease return conditions, general agreement, lease structure etc.

We also provide services to manage the asset data, including the Airworthiness compliance/replaced component/maintenance check records with full traceability of associated documentation to meet the regulatory requirement on behalf of leasing companies/airlines/investors. The secured documents can be stored on our server, which can then be accessed/viewed by the clients, as and when required. Having experienced IT development professionals within our team gives us an edge over the other service providers in this market area utilizing secure web technologies for convenient safe transmission of data.

AERO INTELLIGENCE performs the complete audit and inspection for leasing companies/airlines/small charter operators. AERO INTELLIGENCE also offers professional services to Leasing companies, Start-up Airlines, small charter companies, and legacy carriers for acceptance checks and carries out varied forms of acceptance requirements on behalf of their clients.

We undertake the variety of projects related to aviation, i.e. Annual Review, Technical Audits, Aircraft Document Audits, Lease Monitoring, Asset Management, Due Diligence, pre-purchase/pre-lease inspections, maintenance bridging services, MRO Management, Onsite Representation and Auditing. In short, we intend to be a one stop shop for your aviation technical solutions.

AERO
INTELLIGENCE

Engineering Outsourcing Management

AERO INTELLIGENCE has the capability to manage all outsourced Engineering Projects which includes the following:

- Development of Technical Engineering Orders based on Customer requirement covering Airworthiness Directives/Service Bulletin Incorporation/Custom Modification/Aircraft Paint Definition to name just a few.
- Monitoring of future customer requirements/AD Review for incorporation. 3 - Specialized STC requirements

Inspections

Aero Intelligence has the ability and experience in performing Maintenance and Engineering Audits and Inspections for a variety of Regulatory Approval Jurisdictions. In addition, all required reports and supporting documentation is provided. Internally we have a quality mechanism in place which verifies language and technical data records prior to delivery to customer.

Direct Engineering Support:

AERO INTELLIGENCE has the capability to provide onsite and remote Engineering support for your project. Our capabilities include Comprehensive Engineering Support Packages to provide our customers with:

Generation and Issuance of all Engineering Orders/Modification Manage/Track all documentation requirements for any new Modification Manage/Track all documentation requirements for any De-Modification

Review of Regulatory orders issued by FAA and EASA on a daily basis or as needs arise Generate a monthly Reliability Report for operators by Fleet Type

Review/Author/Revise all maintenance operational documentation (IPC/AMM/CMM/GMM...)

We can provide support in the following disciplines, including new Design Capabilities with supporting DER/DAR Services:

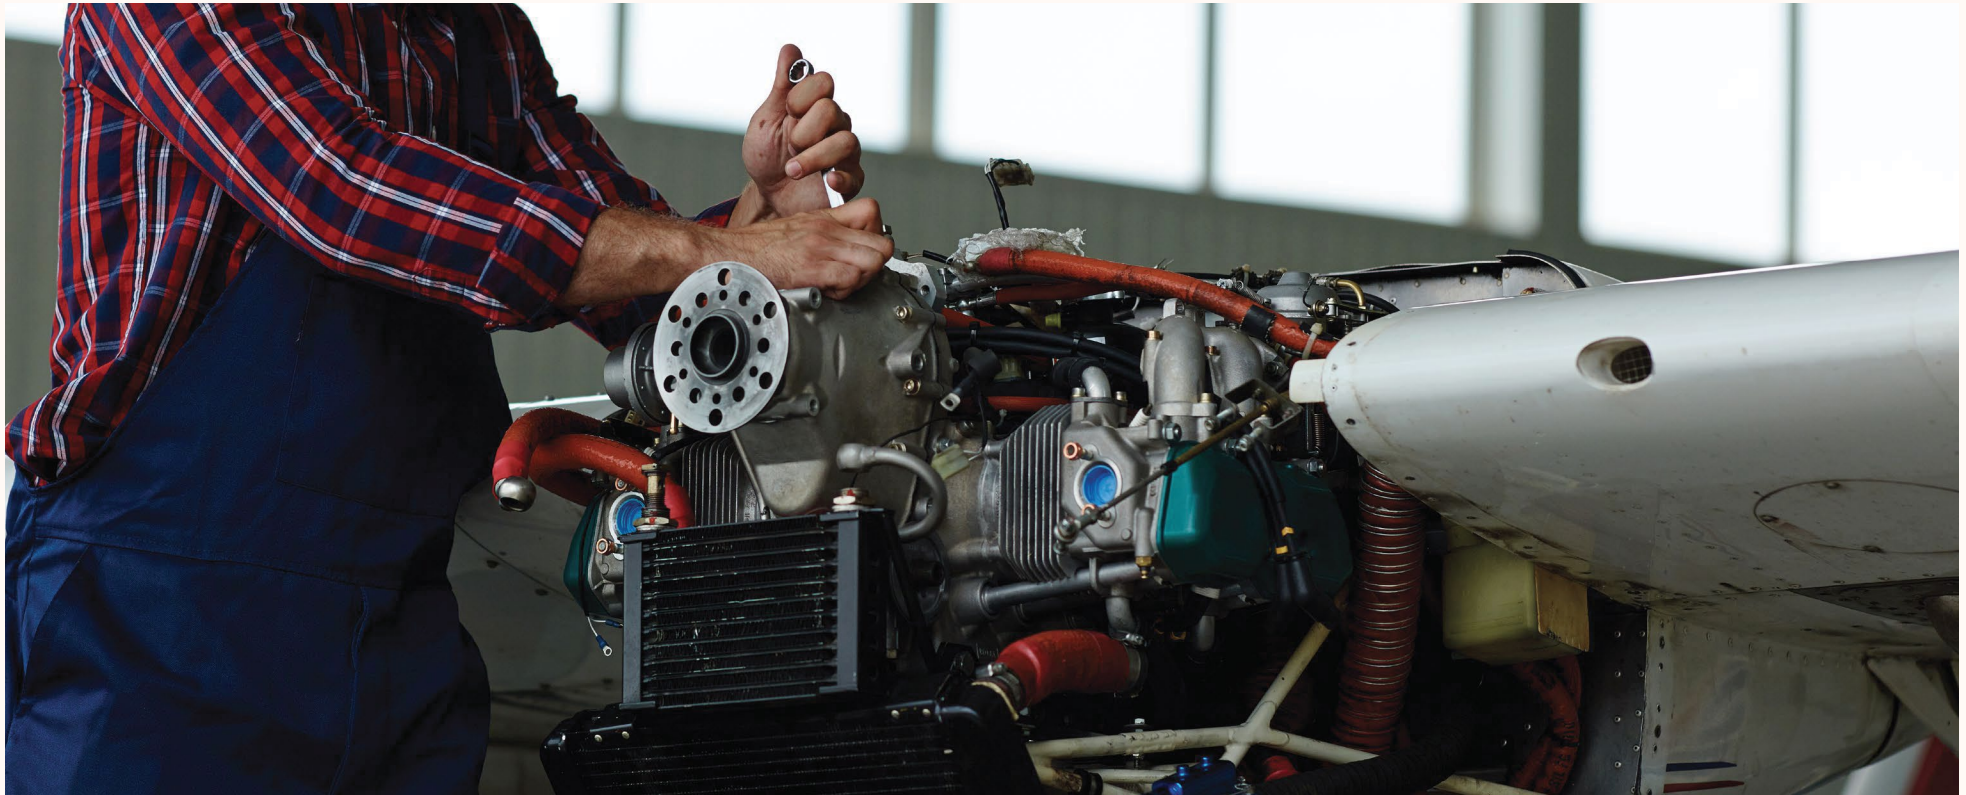

Avionics/Electrical Systems Interiors Structures Powerplant

Recruitment Services:

AERO INTELLIGENCE has expanded our original suite of services to provide our current customers and future customers the ability to rely on our ability to sourcing qualified manpower, support services and over-site for the commercial aviation industry. We specialize in providing. Qualified technical support services (all disciplines) including operations [Weight & Balance]/inspection/material specialists to management. We work with short term as well as long term support requirements.

Project Management:

Through our extended services we can act as your singular focal point for project management for modification line setup support, engineering and certification services, aircraft/asset inspection and sourcing, import/export, A/C registration and start up carrier services including regulatory approval and compliance as well as direct OEM support.

Quality Control Implementation

Aero Intelligence has developed and implements a quality control process specifically designed for the Proposal for Aircraft Management project. This process will work towards a number of objectives:

Reduction of unanticipated problems

Streamlined execution

Rapid resolution of problems that arise and reduction in the re-emergence of these problems

Optimal communication among work teams and individual staff

Frequent checks against overall project quality standards

Specific quality control measures implemented by Aero Intelligence include:

Brief description of quality control standards for the project (RSQCM can be provided upon request)

Communication process

Analytic process: what parameters are analyzed, by whom, how frequently, and how is this reported.

Process to respond to identified problems.

Team members accountable for quality issues and their respective roles.

Any and all quality metrics and data sampling processes

Acceptable tolerances in respect to increases or decreases in metrics

Staff training and educational requirements

Error handling

AL BAWABA MARINE (BMC)

FINANCE AND LOGISTIC SUPPORT

Tahlia road, Arkan Center 3505, Office floor 1,
Office number 105/ Jeddah Saudi Arabia

www.marinegate.net

ACCOUNTABILITY AND LOGISTICAL SUPPORT

BMC understand the financial and operational forces of the transport sector and could assist our clients in dealing with current and emerging issues such as market consolidation, public-private partnerships and financing. BMC offer custom-tailored solutions designed to simplify financial planning and investing, empowering our clients to make informed financial decisions. With a forward-thinking perspective, BMC work to create plans that not only help meet today's financial objectives but also to anticipate and proactively address future and ongoing planning considerations. BMC will financially audit the clients' options and prepare a recommendation for the best course of action.

SUPPLY CHAIN AND LOGISTICS SUPPORT

Our dedicated and experienced professionals always provide you with tailor-made logistics solutions, and our highest priority is to provide the best experience for each customer through customized supply chain and Logistics that takes the extra step and exceeds expectations. BMC ensure end-to-end supply chain transparency and provide accurate information across our service offerings. Exception management, process transparency and free information flow provide awareness of cargo status, giving you situational awareness over your entire supply chain in real-time. BMC serve our customers with attention to accuracy and efficiency.

MISSION

At BMC, our mission is to ensure the safe and efficient fleet operation through expert to manage the Operational and Technical services. BMC is dedicated to providing comprehensive solutions that not only restore functionality but also enhance the longevity and performance of our fleets.

VISION

Our vision at BMC is to be the foremost leader in the fleets operation and repair industries, recognized for our unwavering commitment to excellence, innovation, and customer satisfaction. BMC aim to set new standards for quality and reliability, transforming the way fleet operation and repairs are perceived and executed.

VALUES

BMC prioritize Quality through precise craftsmanship, uphold Integrity, and leverage our Expertise in Fleets Operational Engineering. With a steadfast Customer Focus, BMC exceed expectations, while Innovation drives efficiency. Safety is paramount, and Collaboration fuels our partnerships. These values define our commitment to excellence in fleet operation and repair.

Communication & Navigation

Supply, Installation & Repairing of complete marine communication and navigation systems of various makers and models are done by us.

Electrical & Automation

Supply, Repair and Service, Calibration and Certification.

Gas Detection & Safety

Inspection, Service & Certification.

INMARSAT / VSAT

We provide dedicated Internet communication solutions according to the specific needs of each market segment operated (Merchant, Offshore, Cruises, Yachting, Oil & Gas).

Instrumentation & Calibration

Being an ISO 2017 :17025 & ISO 9001:2015 certified calibration company and backed with a strong technical competency we provide accurate and reliable onsite and lab services for pressure, temperature, electrical, dimensional, mass/balance, volume, torque, flow, gas detection instruments.

Radio Survey

AL Bawaba Marine Gate in KSA is approved by leading classification societies to perform radio surveys worldwide. All of our radio surveyors are qualified engineers and experienced radio technicians trained on GMDSS General Operator Certificate Course (GOC) and have expertise on various radio make and models.

We combine a global network with local expertise to meet your demands and needs, We specialized in providing customized, secure, and time-sensitive solutions for our customers, Our services Including:

- Repair and maintenance of navigation equipment.
- Repair, maintenance and overhaul work for military measurement, inspection and testing equipment.
- Repair, maintenance and overhaul of parts of the military system of vehicles and aircraft.
- Storage in ports, customs duty and free zones areas.
- Private port activities.
- Supplying military system spare parts for military vehicles, aircraft and ships.
- Selling measuring and monitoring devices, navigation equipment and devices.
- Selling wired and wireless equipment and devices.
- Supplying ships excluding fuel of all kinds.
- Check and inspect ship safety equipment.
- Logistic services.
- Travel agent activities.
- Construction of port docks and marine construction.

FINANCE AND LOGISTIC SERVICES

We understand the financial and operational drivers of the transport sector and can assist our firms' clients in dealing with current and emerging issues such as market consolidation, public private partnerships and financing. We offer custom-tailored solutions designed to simplify financial planning and investing, empowering you to make informed financial decisions. With a forward-thinking perspective, we work to create plans that not only help meet today's financial objectives but also to anticipate and proactively address future and ongoing planning considerations

We will financially analyze the clients' options and prepare a recommendation for the best course of action.

SUPPLY CHAIN AND LOGISTICS SOLUTION

Logistics offers solutions for all international logistics needs, including international multi-mode transportation with a combination of land, ocean and air, trilateral transportation, air/ocean consolidation services, customs services, storage, delivery and packing.

Our dedicated and experienced professionals always provide you with tailor-made logistics solutions, Our highest priority is to provide the best experience for each customer, through customized supply chain and Logistics that takes the extra step and exceeds expectations.

We ensure end-to-end supply chain transparency and provide accurate information across our service offerings.

Exception management, process transparency and free information flow provide awareness of cargo status, giving you situational awareness over your entire supply chain in real-time.

We serve our customers with attention to accuracy and efficiency.

Specialized transportation services

Comprehensive warehousing and distribution services

Experience the best in warehousing and distribution solutions

Our team can arrange air freight experts provide timely air freight services that range from time critical next flight out to affordable value air for less critical shipments

Leaders in time critical air freight services.

We offer our clients a variety of time critical air freight services. Let our team recommend the one that best fits your schedule. Our mission is to deliver your time sensitive shipments to the other side of the country or the other side of the globe. All in a timely manner

The Components MRO workshops have a first class reputation for providing inspection, repair, overhaul and preventive maintenance, modification, upgrading, engineering, procurement and logistic services for a wide range of civil and military Aircraft Components,

We offer you a broad spectrum of services and a large variety of maintenance solutions to support the smooth operation of small, mid-size and large fleets.

We have a first class reputation for providing repair, overhaul, preventive maintenance, modification, upgrading, procurement and logistics services for avionic, electrical, transmission, safety, pneumatic, hydraulic, mechanical components and sub-systems for both civil and military aircrafts.

Our Services for the Aerospace Industry are the following:

- Engineering & Technical Support
- Advanced Shipping Solutions
- Inventory spare Support
- AOG Support , Exchange & Loan Services
- NDT in production and MRO (Maintenance Repair and Overhaul)
- Measurement and calibration
- Inspection & Certification
- Lubricant analysis and Testing
- Industrial risks and HSE (very important given the aeronautical context focused on environmental innovations)

CALIBRATION CAPABILITIES

We perform calibrations on a considerable range of test and measurement equipment including weighing systems, cable tensiometers, torque wrenches, micrometers, crimp tools, gauges, microwave generators, avionics testers, various sensors and indicators, air data testers, balances, etc..

QUALITY MANAGEMENT

To earn a reputation for uncompromising quality in a business where standards are set so high, we set our own standards even higher. This means regularly establishing new benchmarks for efficiency, engineering excellence and quality that have helped us obtain an impressive list of certifications and approvals worldwide.

SEA FREIGHT SERVICES

Sea Freight Services Between Saudi Arabia and Sudan

Welcome to our reliable and efficient sea freight services connecting Saudi Arabia and Sudan. Whether you need to ship packages, refrigerators, electrical devices, or personal belongings, we are your trusted partner for secure, timely, and careful shipments.

Good Packaging

We understand that the journey across the sea can be challenging, which is why we prioritize good packaging. Our dedicated team ensures that your items are packed to withstand the maritime environment. From sturdy crates to waterproofing, your cargo will be well-protected throughout the voyage.

Delivery Speed

While sea freight may not be as fast as air shipping, we offer competitive transit times. Our well-organized logistics network optimizes routes to ensure timely delivery of your cargo. We believe in efficient planning to meet your delivery deadlines..

SEA FREIGHT SERVICES

Package Shipping:

If you're sending packages, trust us to handle them with the same level of care you would. Our package shipping service ensures your items are securely packed, labeled accurately, and tracked throughout the journey. Whether it's gifts, documents, or personal effects, your packages are in safe hands.

Electrical Devices Shipping:

Electrical devices, with their sensitivity and value, demand special attention. We are well-equipped to handle electronic equipment. Our anti-static packaging materials and precise handling ensure your electrical devices reach their destination in perfect working order.

Personal Staff Shipping:

When it comes to shipping personal belongings, we understand the significance of these items. Whether you're relocating or sending cherished possessions to loved ones, we treat your personal staff with the utmost respect and care. We offer guidance on packing and secure storage options to suit your needs..
